MOULIN ROUGE SUPERCRAK CRUSSON DINASTY KEEPS GROWING

MOULIN ROUGE : 1ST PLACE FOR SUPER CRACK GRUSON STRAIN

ROBERT VENUS, IS THE MAN, « THE MASTER BREEDER » WHO HAVE MADE THE SUPER CRACK GRUSON STRAIN SO FAMOUS. ROBERT HAS OWNED THE BEST PIGEONS IN THE WORLD, BUT HE HAS ALWAYS SAID « SUPER CRACK IS THE BEST PIGEON EVER » 3 TIMES NATIONAL WINNER!!! AND THIS LINE HAVE GIVEN HUNDREDS OF 1ST NATIONAL WINNERS!!! THIS STRAIN FLY IN MORE THAN 50 COUNTRIES WITH SUCCESS.

Every one has heard of pigeons named Super Crack this and Super Crack that. Mention Super Crack in Belgium, and the mecca of pigeon racing knows only one.... "Super Crack 421-68". The legend of the great 'Super Crack 421- 68' just keeps growing as his direct descendents keep winning both 1st. National and 1st. International races throughout Europe. 'Super Crack' which he is fondly known, won 11 first prizes, from 150 to 650 miles. He bred eight 1st. National winners and is the grand sire to countless more. The descendents of 'Super Crack' are now responsible for eighteen (18) 1st. International winners and one hundred eighteen (118) 1st. National winners. Yes that's one hundred and eighteen! Most Belgium lofts have never even come close to winning a National race. As the Super Cracks rack up major wins, the legacy grows.

The "Super Crack" may be the best pigeon ever. Robert Venus speaks fondly of the cock, as if talking about a beloved son or mother. Venus told me the story of the 'Super Crack'. Venus purchased the pigeon from Crusson. Crusson bought the pigeon from a friend named Hovaere. Crusson thought this amazing cock was a hen and he did not

even let the bird out until the spring before the first old bird season. Well this small cock raced well beyond Crusson's imagination. Sort of like a real life pigeon "Rocky" story. Venus explained the 'Super Crack' won 1st. National three times. Two times being the only day bird against thousands of pigeons. Amazing? Well the story gets better. 'Super Crack' was raced out of a province of France that was included in the Belgium National results. On one long distance race 'Super Crack' again won 1st. which was his fourth 1st. National. Sadly for Crusson and the great 'Super Crack' pigeon, Gerald and Michel Van Hee finished in second place. Van Hee now partitioned the Belgium organization to have the French province eliminated from the Belgian results. Van Hee was awarded the win and 'Super Crack' was awarded a provincial victory. On one occasion 'Super Crack' finished 2nd. National and was beaten by his son when both birds arrived together.

Robert Venus bought this tremendous champion from Crusson in 1974, shortly after 'Super Crack' won 1st. National Barcelona and 1st. National Narbonne. Later he purchased the entire family of Super Crack birds from Crusson. Venus used the 'Super Crack' birds as the base for any long distance family he would introduce. One hen that proved an important addition was "Samantha Fox". "Samantha Fox" was a dark hen and as a late bred yearling flew four 600 mile races in 21 days. "Samantha Fox" scored high in the prizes on each and continued to rack up top positions at the long distance for years.

Many ask, "Are the 'Super Crack Crusson' pigeons strictly long distance pigeons?" The answer is, these pigeons are winning in 46 countries at all distances. They are one day pigeons which make them so impressive when the race gets tough. The 'Super Cracks' win in every climate and at all speeds from disasters to quick races. They race and home on the day and will keep coming with endurance to make it home when most pigeons have long since given up.
